_____

The spider agents gathering the documents may be controlled by

- a proxy file "proxy.ini" for the declaration of a proxy server
  (see "User Manual Part 2: System Management", Section 7.1)

- an option file "options.ictxt" for setting the processing characteristics
  (see "User Manual Part 2: System Management", Section 7.2)

These files are located in the InfoCodex Program Directory and may be edited with any editor.

Further possibilities are provided by the metadata scripts
(see menu "Admin" → "S4 Instructions for metadata").
